

What to look out for during sim

1. Application of crisis resource management principles
 - a. Examples of what was done well
 - i. ?What was said
 - ii. ?What was done
 - iii. ?Reaction of the team
 - b. Examples of where improvements can be made
2. Application of ALS guideline and protocol

Post-simulation debriefing

1. At the end of simulation → Everyone leave everything as is, and move to debrief room
2. Everyone sits down in a circle
3. Ask individually how each participant is FEELING
 - a. This is to diffuse emotions first
 - b. If they start describing events and how they went, redirect them to how they are feeling about it
4. Use CRM principles as a guide to discuss what went well, what could have been done differently
 - a. As much as possible, allow the learner to explore and arrive at conclusion
 - b. Discuss through the stages/events of the simulation as they unfolded
5. At the end, go around the room and get everyone to say what their “one take home message” was
6. If a questionable action/mistake was noticed, bring it up gently and explore
 - a. “I’m not sure if I heard it correctly due to interference [but was there a call for something that they missed]...”
 - b. “I may have missed this, but did anyone [call for adrenaline]...?”
